

PSD-29ZW Z-Wave Dimmer Switch | Green Savings, Green Power

The PSD-29ZW dimmer switch is designed for the user to remotely dim or turn on/off incandescent light via a smartphone or tablet anytime, anywhere. The integration of these devices into your home automation system will allow you to conveniently control home lighting for comfort and energy-saving purposes. The PSD-29ZWR can also function as a Z-Wave router to extend a security system's wireless communication range.

Requires no wiring, the PSD-29ZW can be plugged into a standard power outlet for simple plug-n-play deployment. The slim-sized design of the PSD-29ZW blends naturally into any home décor. Create custom scenes and schedules when integrated with a home automation or security network. Use the PSD-29ZW together with other Z-Wave devices to respond to activities or changes in your home. Enjoy complete control of your lighting whether you are at home or on the go. Creating a green home has never been easier!

Features

- Enables the user to remotely dim or turn on/off incandescent lighting.
- Load type: Incandescent lamps
- Capability to double as a Z-Wave router to extend communication range and extend into hard-to-reach areas
- Enables home automation and security systems to dim or turn on/off lights according to set schedule
- Various regional plugs available
- Can be remotely or manually controlled.
- Plugs into a standard power outlet for easy deployment
- Compatible with other manufacturers' Z-Wave products
- LED serves as an indicator of system status
- Suitable for home automation and security systems

Specifications
